School Accountability

According to the Illinois General Assembly, the primary purpose of schooling is the transmission of knowledge and culture through which students learn in areas necessary to their continuing development and entry into the world of work. To fulfill that purpose, the Ill State Board of Education (ISBE) prepared State Goals for Learning with accompanying Illinois Learning Standards.

The Board of Education gives priority in the allocation of resources, including funds, time, personnel, and facilities, to fulfilling this purpose.

Quality Assurance

The Board continuously monitors student achievement and the quality of the District's work. The Superintendent shall supervise the following quality assurance components, in accordance with State law and IASB-rules, and continuously keep the Board informed:

1. Prepare each school's annual recognition application and quality assurance appraisal, whether internal or external, to assess each school's process for continuous school improvement.
2. Continuously assess the District's and each school's overall performance in terms of both academic success and equity. This includes, without limitation, a thorough analysis of ISBE's balanced accountability measure and each school's *Multiple Measure Index* and corresponding *Annual Measurable Objective* provided by ISBE.
3. If applicable, develop District and School Improvement Plans, present them for Board approval and supervise their implementation.
4. Prepare a school report card, present it at a regular Board meeting, and disseminate it as provided in State law.
5. In accordance with 105 ILCS 5/2-3.153, annually administer a climate survey on the instructional environment within the school to, at minimum, students in grades 4 through 12 and teachers.

3. Assessment processes that include multiple valid, reliable indicators.

The Superintendent or designee shall annually notify the community, parent(s)/guardian(s), students, and school personnel about the APP, the process for referring a student for possible evaluation for accelerated placement, and the methods used to determine whether a student is eligible for accelerated placement. Notification may: (a) include varied communication methods, such as student handbooks and District or school websites; and (b) be provided in multiple languages, as appropriate.

Grading and Promotion

The Superintendent shall establish a system of grading and reporting academic achievement to students and their parents/guardians.

Grading

Every teacher shall maintain an evaluation record for each student in the teacher's classroom. A District administrator cannot change the final grade assigned by the teacher without notifying the teacher. Should a grade change be made, the administrator making the change must sign the changed record.

The loss of instructional time and the inability to make up missed assignments or examinations may impact a student's grade; but in no cases shall grades earned by the student, prior to or subsequent to a suspension, be reduced because of the suspension.

Weighted Grades

Weighted grades may be given in selected courses which are more academically demanding than regular classes because the concepts covered are much more challenging and are studied in greater depth. Such courses shall be offered to encourage students to attempt more difficult course work and to ensure that the instructional needs of all students are met.

Promotion

The Superintendent shall develop guidelines to determine when promotion and graduation requirements are met. The decision to promote a student to the next grade level shall be based on successful completion of the curriculum, attendance, and performance on the required Illinois State Assessment, and/or other assessments. The Superintendent shall develop guidelines to be followed when retention is considered, as well as plans for remediation. The decision for promotion/retention rests with the Building Principal. Students who do not qualify for promotion to the next higher grade level shall be provided remedial assistance and retained in the grade. A student shall not be promoted based upon age or any other social reason not related to academic performance.

The Board of Education delegates to the Administration the final authority to determine if students are qualified for promotion to the next high grade level. If a student's parents do not agree with the school administrator's determination regarding the student's qualification for promotion, they may request a meeting with the Building Principal. If the parents and guardians still are not satisfied after the meeting with the Principal, they may put their concerns in writing to the Superintendent, who shall respond in writing.

The Superintendent or designee will develop procedures to allow for a student to enroll for other course credit.

Other Course Credit

A student may receive high school credit for work completed. Up to a maximum of 2 units of credit may be counted toward the requirements for a student's high school graduation provided the student assumes responsibility for all fees and the Superintendent or designee approves the course in advance.

Substitutions for Physical Education, Adapted Physical Education and Other Required Courses

A student in grades 9-12 may satisfy one or more high school courses (including physical education) or graduation requirements by successfully completing related vocational or technical education courses if:

A student requiring adapted physical education must receive that service in accordance with the student's Individualized Educational Program/Plan (IEP)

A student who is eligible for special education may be excused from physical education courses if when:

High School Credit for Students in Grade 7 or 8

The Superintendent or designee may investigate, coordinate, and implement a program for students in grades 7 and 8 to enroll in a course required for a high school diploma.

If a program is available, students in grade 7 and 8 may enroll in a course required for a high school diploma when the course is offered by the high school that the elementary student would attend and either of the following is satisfied: (1) the student participates in the course at the high school and the elementary student's enrollment in the course would not prevent a high school student from being able to enroll or (2) the student participates in the course where the student attends school as long as the course is taught by a teacher who holds a professional educator license with an endorsement for the grade level and content area of the course.

A student who successfully completes a course required for a high school diploma while in grades 7 and 8 shall receive academic credit for the course. That academic credit shall satisfy the requirements of Section 27-22 of the School Code for purposes of receiving a high school diploma, unless evidence about the course's rigor and content show that the course did not address the relevant Illinois learning standard at the level appropriate for the high school grade during which the course is usually taken. The student's grade in the course shall also be included in the student's grade point average.

High School Credit for Proficiency

Proficiency Credits

Subject to the limitations in this policy and State law, the Superintendent or designee is authorized to establish and approve a program for granting credit for proficiency with the goal of allowing a student who would not benefit from a course because the student is proficient in the subject area to receive credit without having to take the course. A student who demonstrates competency under this program will receive course credit for the applicable course and be excused from any requirement to take the course as a graduation prerequisite. No letter grade will be given for purposes of the student's cumulative grade point average. The Superintendent or designee shall notify students of the availability of and requirements for receiving proficiency credit.

Proficiency credit will be offered in the following subject areas:

Foreign language - A student is eligible to receive one year of foreign language credit if the student has graduated from an accredited elementary school and can demonstrate proficiency, according to this District's academic criteria, in a language other than English. A student who demonstrates proficiency in American Sign Language is deemed proficient in a foreign language and will receive one year of foreign language credit. A student who studied a foreign language in an approved ethnic school program is eligible to receive appropriate credit according to the level of proficiency reached; the student may be required to take a proficiency examination.

Computer Literacy - In order to receive credit, a student in graduating classes through 2017 must pass the Computer Literacy Proficiency Test developed by District 205. A student in grades 9 through 12 is eligible to take the proficiency examination once per year. Starting with the 2018 graduating class this requirement is no longer applicable.

Other proficiency testing - Proficiency testing may also be used to determine eligible credit for other subjects whenever students enter from non-graded schools, non-recognized or non-accredited schools, or were in a home-schooling program.

Student Testing and Assessment Program

The District student assessment program provides information for determining individual student achievement and instructional needs; curriculum and instruction effectiveness; and school performance measured against District student learning objectives and statewide norms.

The Superintendent or designee shall manage the student assessment program that, at a minimum:

1. Administers the State assessment system known as the Illinois Assessment of Readiness (IAR), to all students and/or any other appropriate assessment methods and instruments, including norm and criterion-referenced achievement tests, aptitude tests, proficiency tests, and teacher-developed tests.

3. Provides each student and his or her student's parents/guardians with the results or scores of each State assessment and an evaluation of the student's progress. See policy 6:280, *Grading and Promotion*.
4. Utilizes professional testing practices.

Overall student assessment data on tests required by State law will be aggregated by the District and reported, along with other information, on the District's annual report card. All reliable assessments administered by the District and scored by entities outside of the District must be (1) reported to ISBE on its form by the 30th day of each school year, and (2) made publicly available to parents and guardians of students. Board policy 7:340, *Student Records*, and its implementing procedures govern recordkeeping and access issues.

Test results shall be recorded in the student's temporary school record and are available only to the student, the student's parent(s)/guardian(s), and school personnel directly involved with the student's educational program.
